

UltraFlora® Probiotics

Scientifically verified strains with
established health benefits

Why take a probiotic supplement?

Probiotics are naturally occurring, beneficial microorganisms within your gastrointestinal (GI) tract, where more than 70% of your immune system is located. But unhealthy diets, stress, and other factors can disrupt the body's balance of "good" and "bad" microorganisms and affect digestive, urogenital, respiratory, and immune health. A quality probiotic can help promote healthy microbial balance to support multiple aspects of health.

What is your probiotic not telling you?

✘ Unidentified Strains

Some products may fail to identify the genus, species, and strain. Without this knowledge, you don't know what you are getting.

✘ Unknown Potency

Many product labels list the potency at date of production, not expiration.

✘ Scientific Support

Only some of the thousands of potential probiotics have adequate scientific support.

✘ Questionable Combinations

Many products offer a "one-size-fits-all" approach or contain multiple strains that may not be complementary.

Get the ID Guarantee with UltraFlora® Probiotics

ID Guarantee

UltraFlora® formulas contain genetically identified strains to assure presence of beneficial microorganisms only

Potency Guarantee

For reliable use, UltraFlora® labels state potency per dose through date of expiration based on proper storage

Reputable Scientific Support

UltraFlora® probiotics contain strains with research-demonstrated benefits to health

Range of Targeted Applications

Metagenics® offers a line of 14 distinct formulas, including complementary probiotic blends for daily support and targeted relief for acute or recurring discomfort

UltraFlora® formulas are different

Not all “probiotic” strains are created equal. Depending on the manufacturing source, probiotics can vary significantly in potency, efficacy, and predicted safety. Specific strains can also have different effects on health. The UltraFlora® range makes the choice simpler with distinct formulas to meet individual needs. More importantly—the purity, clinical reliability, and safety of our formulas are guaranteed with scientific identification of strains with established health benefits.

The UltraFlora® Difference

UltraFlora® probiotics, recommended by your healthcare practitioner, provide you with well researched strains and exceptional quality you can rely on to keep you feeling your best.

- ✓ ID Guarantee for reliable health support
- ✓ Well-suited for intestinal survival (based on advanced laboratory testing)
- ✓ Temperature-controlled storage to assure potency
- ✓ Personalized formulas to target individual health needs

UltraFlora® Probiotics

Targeted formulas to meet distinct needs:

- Immune health support
- Digestive health support
- Microbial balance support
- GI integrity support
- Relief of intestinal distress
- Relief of minor GI pain
- Bowel regularity support
- Feminine health support
- Nasal & respiratory health support
