

# MetaKids™

A complete line of children's nutritional formulas designed to help support growth and development

## Beyond the Basics

For babies and young children, balanced nutrition is especially important for healthy growth and development. During this tender season of life, proper nutrition is a top priority.

Kids' little bodies hold big potential, which is why we've created a complete line of nutritional support formulas to help keep up with growing bodies. MetaKids goes beyond your basic multivitamin—with a line of products that provides a full spectrum of nutrients, omega-3s, and probiotics to support overall health.

Kids can have ever-changing tastes, and helping them receive proper nutrition can be especially challenging. To help make your job easier, we've created formulas with chewable and liquid delivery forms. They go down well and come in flavours kids will love!

## Why MetaKids™?

- Complete nutrition line specifically designed for children
- Optimized delivery forms to make nutrition fun
- Great-tasting flavours

## MetaKids™ Range:

**MetaKids™ Nutrition Powder**—a comprehensive formula designed to support the proper growth and development of children

**MetaKids™ DHA**—features a concentrated, purified source of omega-3 fatty acids to support healthy brain function

**MetaKids™ Probiotic**—a great tasting chewable probiotic for daily immune health and digestive support

**MetaKids™ Baby Probiotic**—a unique liquid probiotic blend to help support a healthy intestinal environment

**MetaKids™ D<sub>3</sub> Liquid**—a convenient liquid form to support bone, cardiovascular, and immune health

Featured Product

**MetaKids™ Baby Probiotic**

Probiotics are live microorganisms that can contribute to overall good health. Probiotics act on the digestive tract where more than 70% of the immune system is located. But a number of factors even at early life stages— including delivery method and breast/formula feeding— can influence the body’s balance of “good” and “bad” microorganisms and affect multiple aspects of health. A quality probiotic can help promote a healthy microbial balance to support children’s health and give your kids a healthy start.

MetaKids™ Baby Probiotic features a unique blend of probiotics shown to help support a healthy intestinal environment. The safety and efficacy of these probiotic strains are supported by extensive laboratory research and clinical evaluation and are backed by the Metagenics ID Guarantee for purity, clinical reliability, and predicted safety.

**Key Features:**

- Designed for daily support of digestive function & immune health from 0 to 36 months
- Support for a healthy intestinal environment
- Features a probiotic blend of 1 billion organisms<sup>†</sup> per serving
- Tested in numerous studies

Calories 5

**Amount Per Serving**

A Blend of:	1 billion live organisms <sup>†</sup>
<i>Bifidobacterium animalis ssp.lactis</i> ,	
<i>Lactobacillus rhamnosus GG</i>	

**Ingredients:** Sunflower oil, D-alpha-tocopherol, and citric acid.

**Directions:** Shake well before use. Administer 6 drops of oil onto a spoon or into milk/food once daily or as directed your healthcare practitioner.

**This product is non-GMO, vegetarian, and gluten-free.**

**Storage:** Keep tightly closed in a cool, dry place.

**Caution:** Keep out of reach of children. Discard 4 weeks after opening.

**Do not use if safety seal is missing or broken.**

<sup>†</sup>At date of expiration.

**Emphasis On Safety & Efficacy**

- *Bifidobacterium animalis ssp. lactis* BB-12® and *Lactobacillus rhamnosus GG* have a long history of use in infants and are backed by numerous studies—including infant studies
- *Lactobacillus rhamnosus GG* has been clinically shown to help colonize the intestinal tract and support gastrointestinal function
- Strict criteria for raw material quality to support use in infants
- Each strain has been documented to support immune health in infants

**Quality & Stability You Can Rely On**

- Does not contain the anti-caking agent silicon dioxide, which is present in other similar products available on the market
- Guaranteed number of live active organisms at date of expiration
- Well-documented stability during usage with proper storage
